INDEX

ABILITY to do muscular work, and fatigue, vitamin supplementation of U. S. Army rations in relation to 259
Acid(s), ascorbic, daily intake of, required to maintain adequate and optimal levels of this vitamin in blood plasma 483
—— ascorbic, in normal adults, effect of controlled ascorbic acid ingestion upon urinary excretion and plasma concentration of 111
—— ascorbic (vitamin C), ingestion of, rate of increase of blood plasma ascorbic acid after 309
—— citric, effect on growth and calcium assimilation of — potassium citrate mixtures 293
—— content of meats, pantothenic determined by microbiological method, effect of enzymatic digestion on 239
—— excretion, ascorbic, at known levels of intake as related to capillary resistance, dietary estimates, and human requirement 399
—— ingestion, ascorbic, effect of controlled, upon urinary excretion and plasma concentration of ascorbic acid in normal adults 111
—— metabolism, nicotinic, studies in. I. The fate of nicotinic acid in man 23
—— metabolism, nicotinic, studies in. II. The fate of nicotinic acid in normal and black tongue dogs ... 35
—— nicotinic, in foods, distribution of 417
—— pantothenic, and an unidentified factor in reproduction in the domestic fowl, need for 153
—— pantothenic, in nutrition of rat 47
—— requirement, pantothenic, and age in rat, relationship between 545
—— requirements, ascorbic, of children 195
—— sulphur amino, relation of, to toxicity of cobalt and nickel in rat 603
Adaptation, previous, to temperatures between 10° and 31°C., heat production of rabbit at 28°C. as affected by 83
Adequacy of simplified diets for guinea pigs and rabbits 533
Adequate and optimal levels of ascorbic acid in blood plasma, daily intake of this vitamin required to maintain 483
Adults, normal, effect of controlled ascorbic acid ingestion upon urinary excretion and plasma concentration of ascorbic acid in .. 111
—— utilization of calcium of carrots by 1
Age, and pantothenic acid requirement, in rat, relationship between 545
Albino rat, growing, interrelation of calcium and fat utilization in .. 375
—— thiamine, riboflavin, pyridoxine and pantothenate deficiencies as affecting appetite and growth of 555
Alpha-tocopherol requirement of the mouse 513
American diet, average, studies of. I. Thiamine content 613
—— Institute of Nutrition, proceedings of ninth annual meeting ... 645
Amino acids, sulphur, relation of, to toxicity of cobalt and nickel in rat 603
Antirachitic properties of A.T.10 for the rat and chicken 217
Appetite and growth of albino rat, thiamine, riboflavin, pyridoxine and pantothenate deficiencies as affecting 555
ARMSTRONG, WILLIAMINA. See Breiter, Mills, Rutherford, Armstrong and Outhouse 1
Aromatic hydrocarbons, effect of, on growth of young rats 425
Ascorbic acid, blood plasma, rate of increase of, after ingestion of ascorbic acid (vitamin C) 309
—— daily intake of, required to maintain adequate and optimal levels of this vitamin in blood plasma .. 483
—— excretion at known levels of intake as related to capillary resistance, dietary estimates, and human requirement 399
—— in normal adults, effect of controlled ascorbic acid ingestion upon urinary excretion and plasma concentration of 111
—— requirements of children 195
—— (vitamin C), ingestion of, rate of increase of blood plasma ascorbic acid after 309
Assay, rat, vitamin E content of certain varieties of wheat, corn, grasses and legumes as determined by 633
Assimilation, calcium, of citric acid and effect on growth — potassium citrate mixtures 293
A.T.10, antirachitic properties of, for rat and chicken 217
Availability to rats of phosphorus in red clover hays of widely varying phosphorus content 501
Avitaminosis A, certain relationships of, to vitamin C in young bovine.. 525
Award, Mead Johnson, presentation of, for research on vitamin B complex for 1942 648
